

AGDB/918-2 & AGB/918-2

# AGDB/918-2 & AGB/918-2

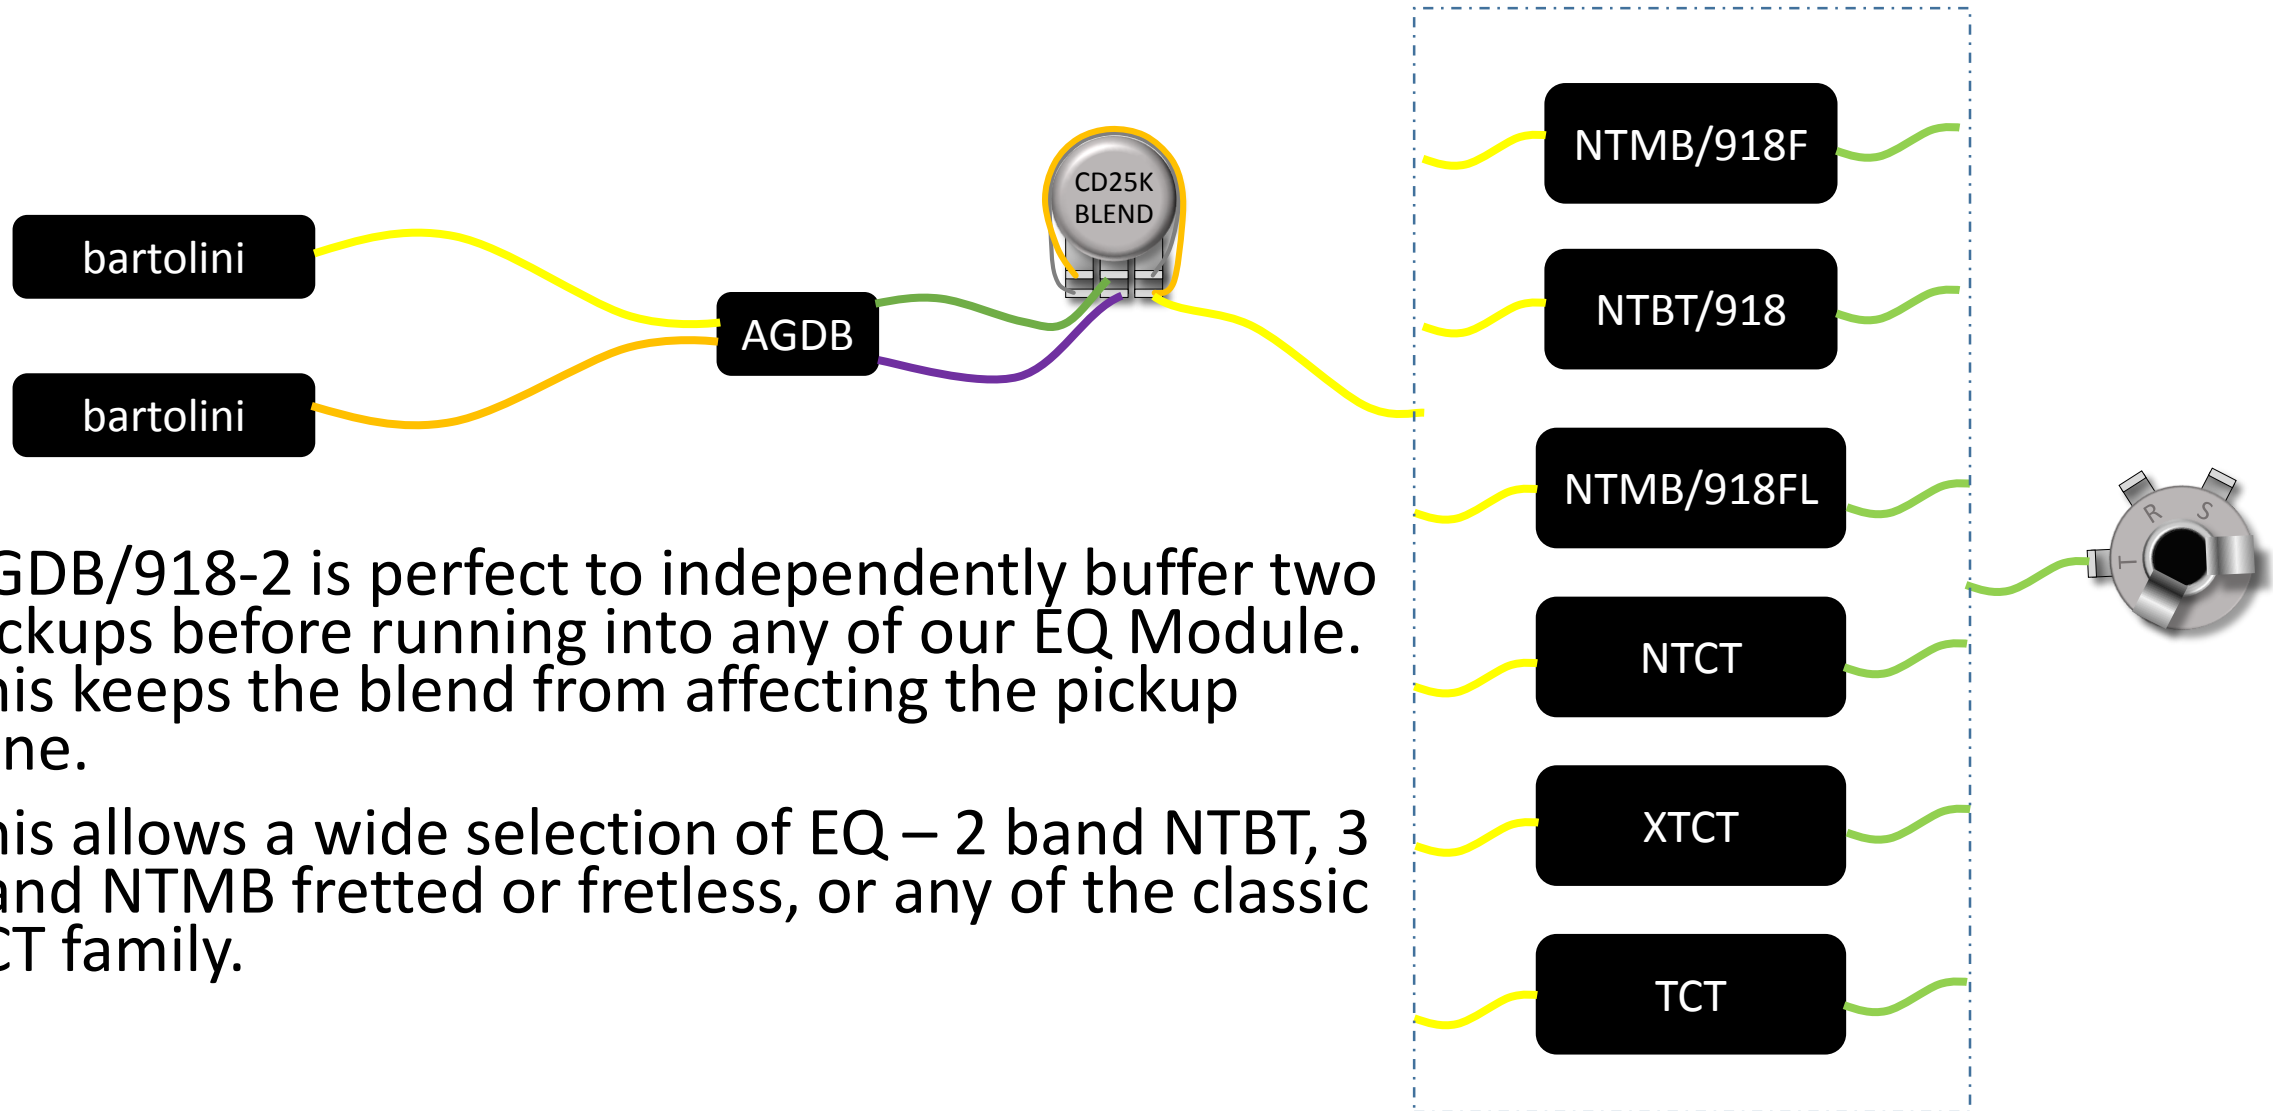

- Flexible Adjustable gain buffers can be used in many ways to improve tone.
- AGB/918-2 is an Adjustable Gain Buffer that can operate with 1 or 2 9Volt batteries. The AGB/918-2 has a single buffer that provides up to 11dB of low noise gain with an extremely flat frequency response.
- AGDB/918-2 is an Adjustable Gain Dual Buffer is just like the AGB/918-2 except that it provides two independent buffers.

# AGDB/918-2 Dual Pickup Preamp

- AGDB/918-2 is great for providing a good, strong output.
- For simple installations with no need for onboard EQ, the outputs can be controlled with independent volumes.
- The adjustable gain lets you balance the output level of each pickup while making sure the overall output is as high as you want.

# AGDB/918-2 Independent Pickup Buffering

- AGDB/918-2 is perfect to independently buffer two pickups before running into any of our EQ Module. This keeps the blend from affecting the pickup tone.
- This allows a wide selection of EQ – 2 band NTBT, 3 band NTMB fretted or fretless, or any of the classic TCT family.
