

The DTA1 modules are fixed gain dual buffers for use with magnetic pickups (guitar or bass). Their purpose is to increase tonal clarity by removing the loading effects of volume controls, blend controls or output cables. They can also be used to improve the action of the blend control.

Buffer	Gain
DTA1.1	1x (0 dB)
DTA1.2	2x (6 dB)
DTA1.3	3x (9 dB)
DTA1.4	4x (12 dB)

For all DTA's:
 Input impedance is 1 Meg-ohm
 Output impedance is less than 5K-ohm
 Battery drain is 400 microamperes
