

### MTD Sarasota Bass Preamp

The NTMB+FL used in MTD Sarasota basses is a tone control preamp with fully independent Bass, Mid and Treble controls with very low noise and wide boost/cut range. The MTD Sarasota has an adjustable gain trimmer which allows you to boost the input signal up to 12dB while maintaining flat frequency response. The bass is wired for 18V operation uses about 1mA from two 9-volt batteries for more than 4 months of average usage.
