

# bartolini PICKUPS AND ELECTRONICS

94J, 9W, 9W6, 9W5, 59V, or 9V pair  
with XTBT (Volume, Blend, Treble and Bass controls)

For high output pickups like 94J, 9W, 9W5 and 9W6 the grey and white leads should be covered with tape or shrink tubing so that they do not touch each other or ground. For lower output pickups like 9V or 59V a 6.8 K-ohm resistor should be connected between the grey and white leads increase the output level
